

EARLY CHILDHOOD EDUCATION HARTFORD JOINT 1

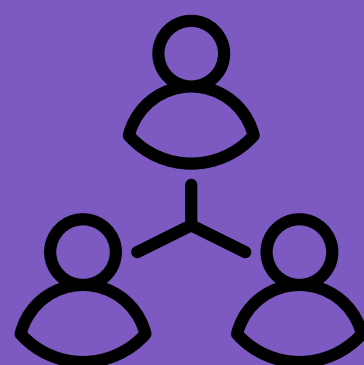

CHILD DEVELOPMENT SCREENING

At times, the question can come up as to whether a child is developing typically or is delayed. A team of professionals from our district have the ability to screen, assess further if needed, and provide thorough feedback to parents about their children. This screening process is available to children ages 3-4 living within the district.

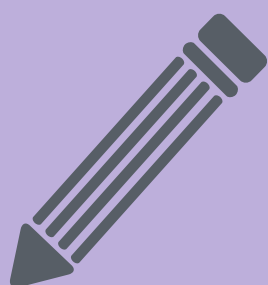

OUR STAFF

The staff working with your children have a passion for what they do and working with students in this age range. They have a wealth of experience and will provide top notch expertise and care.

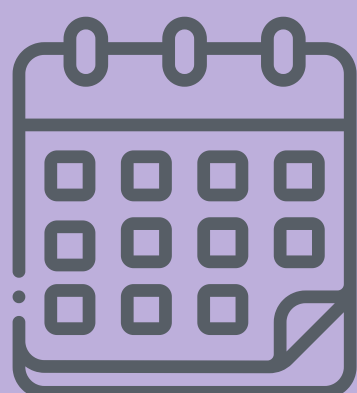

QUALIFICATIONS FOR SERVICES

If after being screened, a child is shown to have weaknesses in a certain area of development, a more thorough evaluation will be conducted by a psychologist and other members of the team that are necessary to evaluate. This evaluation process will determine whether a student's needs qualify and would benefit from early childhood education services.

SERVICES

Students will receive any services they qualify for such as physical therapy, occupational therapy, and speech and language during their school day.

SCHEDULE

Students will attend anywhere from 1 to 4 half-days per week depending on their needs.

THE CLASSROOM

Students who qualify will attend a classroom located at Lincoln Elementary School. This classroom provides a warm and nurturing environment with a low staff to child ratio. A play-based approach to learning keeps students engaged and having fun while making progress towards their goals.
